AIDE User Forum Workshop
15-16 March 2005
BAST premises, Cologne, Germany

PRE-ANNOUNCEMENT— SAVE THE DATES

The AIDE consortium is pleased to announce the realization of the first AIDE User Forum workshop that is going to be held at BAST premises, in Cologne, Germany, 15-16 of March 2005.

AIDE is a 6th FW EU co-funded integrated project on the development of an Adaptive Integrated Driver-Vehicle Interface.

"The AIDE Integrated Project: European automotive industry and research institutions join forces towards the driver-vehicle interaction concepts of the future"

The AIDE User Forum aims to bring together all stakeholders in the area of the Automotive HMI and to create a community where AIDE concepts and developments will be discussed, reviewed and updated.

This first AIDE UF Workshop will discuss a number of issues regarding HMI architecture, Design scenarios for an adaptive HMI, Standards and Guidelines, Driver-vehicle-environment modeling for HMI design, behavioural adaptation to ADAS and IVIS and HMI evaluation issues.

The first day of the workshop will include plenary and keynote presentations and a round table discussion where key stakeholders will participate (EC, EUCAR, CLEPA, ERTICO, FIA, public authorities etc).

The second day will have several parallel sessions as the above mentioned items.

The AIDE results on architectural concepts and HMI designs will be presented and discussed.

We invite you to save these dates for this important event on HMI issues.

The draft workshop agenda and the registration form will follow soon. For more information on the workshop please visit AIDE's website (www.aide-eu.org) or contact AIDE Dissemination manager:
